UAS PEMROGRAMAN BERORIENTASI OBJEK

Tambah Data (Seblak)

Edit Data (Dimsum)

The screenshot shows a Java IDE with a 'Data Barang' dialog box open. The dialog box has input fields for 'Kode Barang', 'Nama Barang', 'Harga Barang', and 'Stok Barang', along with buttons for 'Baru', 'Simpan', 'Ubah', and 'Hapus'. Below these fields is a table with the following data:

Kode Barang	Nama Barang	Harga Barang	Stok Barang
1	Bakmie	12000	15
2	Bakso	15000	10
3	Fried Chicken	10000	20
4	Dimsum	12000	30

The background code editor shows the following Java code:

```
250 public static void main(String[] args) {  
251     new FormBarang();  
252 }  
253  
254  
255 class Barang {  
256     private String kode_barang;  
257     private String nama_barang;  
258     private String harga_barang;  
259     private String stok_barang;  
260  
261     public String getkode_barang() {  
262         return kode_barang;  
263     }  
264  
265     public void setkode_barang(String kode_barang) {  
266         this.kode_barang = kode_barang;  
267     }  
268 }
```

Hapus Data (Bakso)

The screenshot shows a Java IDE with a 'Data Barang' dialog box open. The dialog box has input fields for 'Kode Barang', 'Nama Barang', 'Harga Barang', and 'Stok Barang', along with buttons for 'Baru', 'Simpan', 'Ubah', and 'Hapus'. Below these fields is a table with the following data:

Kode Barang	Nama Barang	Harga Barang	Stok Barang
1	Bakmie	12000	15
3	Fried Chicken	10000	20
4	Dimsum	12000	30

The background code editor shows the following Java code:

```
250 public static void main(String[] args) {  
251     new FormBarang();  
252 }  
253  
254  
255 class Barang {  
256     private String kode_barang;  
257     private String nama_barang;  
258     private String harga_barang;  
259     private String stok_barang;  
260  
261     public String getkode_barang() {  
262         return kode_barang;  
263     }  
264  
265     public void setkode_barang(String kode_barang) {  
266         this.kode_barang = kode_barang;  
267     }  
268 }
```
